2060. *AUCUBA japonica* is, in p. 379., wrongly placed in the class Monœcia, and order Tetrândria: it belongs to Diœcia Tetrândria; and it is presumed that only the female sex has been yet introduced into Britain; at least, all the plants to be met with in blossom (and these are not few every spring) are of this sex.

*Caladium grandifolium* Sims in Bot. Mag. 2643. Not *A'rum grandifolium* Jacquin.

Now that I have seen a recent flowering specimen of the true *C. grandifolium*, I cannot but come to the conclusion that Dr. Sims's plant is of quite another species, with leaves glossy on the upper surface, and having a broad semicircular sinus at the base with differently shaped lobes, and a spathe almost exactly resembling, both in form and colour, that of our *C. fragrantissimum*; being red, and remarkably inflated below, and not pale green, and attenuated at the base. — Dr. Hooker.

 Mr. Allan Cunningham has in the Bot. Mag. for May, t. 3323, supplied a synopsis of all the known species of this Erica-like habited genus; and sketched their distinctive characters, and assigned their habitats and synonyms. The names of the neglected species are these:—With the leaves stipuled: glabra R. Br., virgata Cunn., cartophylla Cunn., tetrapera Dec., decandra Dec., Fräseri Cunn., flavescens Cunn., strigosa Cunn., brunoides Cunn., scabra Dec. With the leaves not stipuled: conferta Cunn., macrophylla Cunn., with which the extispulata Dec. is synonymous. Mr. Cunningham has stated that "three species of this genus are now in cultivation in the English gardens." These we have given above, with tabular details; and, as we cannot find any trace of the C. barbata and C. pubescens given in p. 199., it seems advisable to cancel the account of the genus therein given, and to substitute the present one.

*Tropaeolum pentaphyllum Lam.* "Mr. D. Don deems this plant the type of a new genus, which he has named as above. He has given his reasons at length in *Ann. Trans.* xvii. p. 14, and 145. From the *Flower-Garden*, we may just quote as follows:—"The most remarkable peculiarity is in the nature of its fruit, which is a black juicy berry, not unlike, both in appearance and flavour, the *Zante* grape. Besides the reduced number of its petals there are but two characters the importance of which I am not disposed to insist much upon, the genus likewise differs in the persistent nature and valvate aestivation of its calyx, that of *Tropaeolum* being imbricate and deciduous. . . . I am inclined to think that *T. dipetalum* *Flor. Peruv.* will prove a second species of *Chymocarpus*; and it is possible that *Tropaeolum* may include the types of other genera, when the nature of the fruit in the different species becomes better known. . . . *Chymocarpus pentaphyllum* is stated to have been introduced in 1824; but this information is erroneous, the plant having been first raised by Mr. Neill, in 1830, from seeds collected at Buenos Ayres by Mr. Tweedie."

 Has not yet been introduced to Britain. It is probably a native of the east coast of Africa; but was only seen by Professor Bojer, in 1824, in the Bay of Bombatoe, on the western coast of Madagascar, where a single tree was cultivated by the inhabitants. That indefatigable naturalist obtained one, which he took to the Mauritius, where it has perfectly succeeded; and we may soon expect to add this most ornamental plant to the stoves of our own country. Its flowering season in the Mauritius is April and May.

 There are plants in the Hort. Soc. Garden under the names of *C. thurifera*, and *C. Tournefortii* Audbert, received from Tarascon in 1834; both of which are too small to enable us to decide whether they are distinct species, or synonyms of others already registered.

 C. barbata Swt. in *Brit. Flow. Gard.* l. s. 273, No. 28170. in p. 475.

"When this plant was first introduced, it was supposed to be the same as the *Fritillaria barbata* published in M. Kunth's account of the plants discovered by Humboldt and Bonpland; but we learn, from the last volume of Römer and Schultes, that that species has a bearded horseshoe mark on its sepals, no trace of which can be found in the plant now figured. We are, therefore, unwillingly obliged to amend the name by which this has hitherto been known: a name which would be untenable even if *Fritillaria barbata* were the same plant, because it [expressive of the bearded inward face of the petals] is equally applicable to every species of the genus." (*Bot. reg.*, April.)

Of this genus, which is closely allied to *Calochortus*, two species are registered in p. 475.; namely, *C. purpurea* and *C. barbata*. To these the species hitherto called *Calochortus elegans*, and the following species introduced by Mr. Douglas, are now to be added:—

"Owing to the imperfect state of the anther, we [Drs. Hooker and Lindley] cannot refer it with certainty to the present genus."—*Hooker.*

*E. asperum* Lindl. This interesting species has recently flowered in the garden of Thomas Harris, Esq., of Kingsbury. (*Bot. Reg.*, April, 1838.) *E. chloranthum* Lindl. A green-flowered species, allied to *Encycla viridiflora*, a native of Demerara, whence it was sent to Messrs. Loddiges by M. Schomburgk in 1837. (*lb.*) *E. pachyanthum* Lindl. A large green-flowered species, sent to Messrs. Loddiges from Guiana by M. Schomburgk. (*lb.*) *E. pictum* Lindl. Resembles *E. odoratissimum*, with dull yellow flowers, neatly striped with crimson. Received from Demerara by Messrs. Loddiges. (*lb.*) *E. smaragdinum* Lindl. Closely allied to *E. orchidiflorum*. Obtained from Demerara by Messrs. Loddiges. (*lb.*) *E. varicosum* Bate. ms. A small-flowered dull-coloured species, from Guatemala, whence it was imported by Mr. Bateman. (*lb.*) *E. altissimum* Bate. ms. An epiphyte from the Bahamas, in the collection of Mr. Bateman, and also in that of Messrs. Rollisson. It grows in great abundance among rocks, among other pseudo-bulbous epiphytes. "At the period of Mr. Skinner's visit, they were in a parched and torpid state; but he was informed by a resident that, during the season of their flowering, they scented the air to an extraordinary and almost insupportable degree. To this excess of sweets, *E. altissimum* contributes a powerful odour, resembling bees' wax; but in potency it is far surpassed by another unpublished species from the same quarter, for which I am also indebted to the zeal and liberality of Mr. Skinner, and which yields a perfume at once delicate and powerful, and so closely resembling that of our wild English primroses, that I have in consequence named it *E. primulinum*." (*Bot. Reg.*, May, 1838.) *E. cucullatum* Lindl. One of the most unattractive species of this large genus, obtained from Para by Richard Harrison, Esq., of Liverpool. Flowers small and white. (*lb.*) *E. longicollis* Lindl. Obtained from Demerara by Messrs. Loddiges, and nearly allied to *E. nocturnum*. Flowers pale yellow and white. (*lb.*)

Seems essentially distinct from *E. arborea* in its larger flowers, more slender leaves, less hardy branches, and truly bell-shaped corolla; which has by no means the globular form of that of *E. arborea*: its stigma is, moreover, very small, and not at all dilated or lobed, either when dried or recent. *E. polytrichifolia*, which, we presume, is the *E. arborea stylosa* of English gardens, is equally distinct in the same characters.—*Lindley.*

|       | 2 Smithii Loudon, Smith's of Afr. | The plant to which this name is applied in appearance closely resembles <i>J. chinensis</i> . The plant in the Hort. Soc. Gard. is of vigorous growth, and worthy a place in every garden. There is a plant extant in some Scotch nurseries, commonly called <i>J. nepalensis</i> , which is, in all probability, identical with <i>J. c. 2 Smithii</i> Loudon. |   |           |        |    |                 |         |                    |

148. LIBERTIA Spr. LIBERTIA. (*Mademoiselle M. A. Libert de Malmedy*, a Belgian.) *Iridae*. 4. —  
 Synonyms. This genus was separated from *Sisyrinchium* by Dr. Brown, who gave to it the name of *Renealmia*; a name applied by Linnæus, but subsequently suppressed by Smith, to some or all of the species of the modern genus *Alpinia*: but, as the genus *Renealmia* has been restored, upon good grounds, by Roscoe, it becomes necessary to adopt, from Sprengel, the appellation *Libertia* for the genus of Brown, which is a most natural one. The *Libertia* of Dumortier is *Hösta* of Trattinick, and *Fönkia* of Sprengel; and *Libertia* of Lejeune scarcely appears different from Brown's [? from *Bromus*]. (*Dr. Hooker, Bot. Mag.* 3294.)

*Libertia* Spr. *Renealmia* R. Br. *Nematostigma Dietrich*. The *Libertia* of Lejeune, or *Michelaria* of Dumortier, is considered, with good reason, to be a *Bromus*. (*Dr. Lindley, Bot. Reg.* 1630.)

- The conductor of the Floricultural Cabinet has noted in the number for May, that he, in a recent visit to York and its neighbourhood, was much pleased to see several very strikingly handsome varieties of Mimulus; which had been raised, by cross-impregnation, from the M. variegatus, roseus, luteus, Youngii, Smithii, bifrons, &c. These were in the possession of lovers of flowers and of floriculture, and of Messrs. Backhouse, nurserymen, York.

| All the varieties raised at Arley [we suppose, those whose names are registered in Hort. Mr. D. Don has, in the place cited, investigated the structure and affinities of this plant; and deems it a form of a distinct and natural genus, which he has characterised, and named *Pericallis*. To it he would refer this plant, and *Cineraria cruenta*, aurita, lactea, lanata, multiflora, populifolia, and malvifolia. The genus *Pericallis* has, he has remarked, the habit of *Tussilâgo*, the involucrem of *Othónna*, and the corolla of *Senecio*.

3614. 1341a. PERNETTIA Gaudich. (*Dom Pernetty*, author of a Voyage to the Falkland Isles.) *Ericacæ*. 4.—  
Generic relations: Gaudichaud has referred to this genus *Arbutus mucronata* L. fil. [Hort. Brit. No. 28625.], *pumila* [Hort. Brit. No. 11080.], and *microphylla*. "In both [the genera] *Arbutus* and *Arctostaphylos*, the anthers have two long horns projecting from their back, and the ovary is surrounded by a fleshy ring with ten angles; but in the *Pernettia mucronata* [and all the *pernettias*] the anthers have no horns, and are split into four bristle-shaped teeth at their apex, while the base of the ovary is surrounded by ten distinct scales. The genus *Pernettia* is, in reality, much more nearly allied to *Andrómæda* and *Gaulthiëria* than to *Arbutus*, particularly to *Andrómæda Myrsinites* and *Gaulthiëria serpyllifolia*; which last is certainly no *Faccinium*. As far as habit and the structure of the flowers are concerned, *Arbutus pilosa* Graham [Bot. mag. 3177., Gard. mag. 8.] would also be referable to *Pernettia*; but we incline to believe that plant an *Andrómæda*." — *Dr. Lindley*.

*Arbutus pumila* Forst., *Hort. Brit.* No. 11080.  
M. Gaudichaud, in his visit to the Falkland Islands, found plenty of another species (*Pernettia empetrifolia*), which formed a small bush covered with eatable berries, and growing at the back of the sand hills, wherever a little vegetable mould had been collected. (*Bot. Reg.*)

 Petunia phœnicea proves itself to be, like P. nyctaginiflora, a persistent shrub, in a mild winter and sheltered warm aspect.

*Dillwynia tenuiroldes Sieber.* The *Pultenæa flexilis* of Sweet's *Flora Australasia*, t. 35., has glaucous leaves and hairy calyxes; and is a plant entirely different from the *P. flexilis Sm.*, which is closely allied to *P. polygalicifolia Rudge*; but the calyx of that species is interspersed with villous hairs, its leaves are smaller, and it is altogether a more abundantly flowering plant. *P. euchlia Dec.* has also smaller cuneated leaves, and a remarkable ample calyx; like, as Decandolle observes, *Euchlus R.Br.*; and, to my view, especially like that of some *Gompholobla*. *R. Menziesii Smith.* Raised from the last parcel of seeds received by the Horticultural Society from Mr. Douglas. It is allied to *R. speciosum*, with the young branches covered with slender bristles, like those of *R. lacüstre*. The flowers appear, from the dried specimens, to be of the same colour as those of *R. speciosum*, but paler; and they are without the long-projecting crimson stamens, which give *R. speciosum* so strikingly beautiful an appearance. The plants appear to be hardy, but they have not yet flowered. (*Miscell. Bot. Reg.*, May, 1838.)

3484. *SOLLYA heterophylla* Lindl. Mr. D. Don has described this plant in Sweet's *British Flower-Garden* for March, 1834, t. 232. In the number for August, there is the following corrective note relative to it: — "Having had an opportunity of examining samples of the fruit which ripened at Mr. Knight's during the past summer, I now find that it is a berry [the genus *Sollya* was distinguished from the genus *Billardiæra*, on the assumption that the fruit of the former was a capsule; and, perhaps, on other points: the fruit of *Billardiæra* is a berry], and that its structure differs in no respect from that of *Billardiæra*; with which genus the plant must be again combined." — *D. Don*.

Allied to *V. corymbosum* L. It may possibly be the *V. album* of Lam. (not of Linn., for that Sir James  
Smith has ascertained to be the *Xylöstem ciliatum*  $\beta$  Ph., nor of Pursh, which is *Faceium* stamineum

3274. UREDO.

27927 suaveolens Pers. syn. *Aecidium Cárdui* Sow., who has given a figure of it in his *Coloured Figures of English Fungi*, iii. t. 398. fig. 5.

Early in June, 1833, I observed, in a group of plants of *Cnicus arvensis* Sm. (*Cirsium arvense* Lam.), one plant of a yellow brown hue, and more luxuriant than the rest. It was the subject of a parasitic fungus abounding all over it, and with which the luxuriance was doubtless connected: and hence this luxuriance may be assumed to have been, like that of the leaves of *Anemone coronaria* (described in *G. M. iv.* 192.), a morbid one. I sent a specimen of the fungus-inhabited *Cnicus* to Mr. J. D. C. Sowerby, who identified the fungus as the *Aecidium Cárdui* above quoted. This specimen, returned by Mr. Sowerby, gave out a very sweet and grateful odour for some months; and even now (June 11. 1834), may be, on being smelled to, perceived to be fragrant. On consulting *Hort. Brit.*, the only species which seemed to me likely to be identical with this is the *Uredo suaveolens* Pers.; and Mr. Baxter of the Oxford Botanic Garden, to whom a question on its identity has been submitted, has answered it thus:—"A person describes his *Uredo* *suaveolens* as growing on the leaves of *Cnicus arvensis* Sm.;

and I find it abundant on that plant in the neighbourhood of Oxford. Mr. Sowerby's *Æcidium Cárdui* is said to grow on the leaves of *Cnicus pratensis Willd.*, a plant which is also not very uncommon near Oxford; but on which, while in a living state, I have not at present observed any species of fungus to be parasitical. May not the word *pratensis*, in Mr. Sowerby's work, be a misprint for *arvensis*? especially as the bit of a leaf represented at t. 398, fig. 5, bears a greater resemblance to the foliage of *Cnicus arvensis* than it does to that of *C. pratensis*. Specimens of *Urèdo suavèolens* of Persoon, on the leaves of *Cnicus arvensis*, from this neighbourhood, accompany this letter."—*W. Baxter, Jan. 24. 1834.* The figures of the leaf in Sowerby's figure do, as Mr. Baxter has remarked, exactly resemble the leaf of *C. arvensis*, and but little, or not at all, that of *C. pratensis*.—*J. D. June 11. 1834.*

| ARPOPHY'LLUM spicatum La Llave. "One of the most graceful and beautiful of the Mexican Orchidæcæ; it has recently reached England in a living state." It was found growing on trees, and is very rare even in its native country. Its flowers are pink or pale purple, and are disposed in a dense spike. The genus is very near Ponera (Bot. Reg., Feb. 1839.) |                                                       |        |                        |                    |                 |                   |                       |                  |                                                       |                |                |                                                                                 |

*E. ionosmum* Lindl., imported by Messrs. Loddiges from Essequibo, has the delicate and delicious fragrance of the violet. (*Bot. Reg.*, July, 1838.)

*E. vesicatum* Lindl. is a curious Brazilian species imported also by Messrs. Loddiges. It approaches

*E. equitans* in habit; but, in the structure of both flowers and leaves, it is widely different. (*ib.*)

*E. selligerum* Batem. MS. A pretty and distinct species; a free grower, with an odour like that of the tuberose. (*Bot. Reg.* June, 1838.)

*E. (Hormidium) unidorum* Lindl. "A Mexican plant of no beauty, with yellowish green flowers."

Under this head, Dr. Lindley gives some observations on the genus *Epidendrum*, which, he thinks, cannot be divided. For this reason, he has suppressed the genera *Auliza Sal.*, the type of which is *E. ciliare*, *Amphiglottis Sal.*, and *Encyclia Hook.*; and he thinks that the *Prosthècia* or *Epithècia* of Knowles and Westcott will not stand. Dr. Lindley, however, thinks that the present plant may form the type of a new genus, which he has named *Hormidium*. (*Bot. Reg.*, Feb. 1839.)

- HARDENBERGIA is the name proposed by Mr. Bentham to be given to a group of six species of climbers, which he has separated from the old genus Kennèdyia. These six species are "all found in extra-tropical Australia: all of them are very much alike in the general appearance and colour of their flowers; and all are highly ornamental, from the great profusion of their flowers when under proper treatment. Next to the zichyas, they form the handsomest of the groups of which the old Kennèdyia consisted, and which are still known under that name in our gardens." The flowers are small, of a bluish pink, very numerous, and disposed on many-flowered racemes. The plant is named in honour of Frances Countess Hardenberg, sister of Baron Charles Von Hügel of Vienna; "a lady most zealous in the promotion of botany and horticulture." (Botanist, Sept.) *P. lutëola Hook. Exot. Fl. t. 105.; syn. Dendrobium polysticton Swartz.* This plant, Dr. Lindley observes, is certainly from the West Indies; and it is by mistake, that the specimen of it in the Liverpool Botanic Garden is said to be from the East Indies, and to have been received from Dr. Wallich, as it does not appear among any of the doctor's collections. (*Bot. Reg.*, Oct. 1838.)  
*P. zeyliana Lindl.; syn. Dendrobium polystächyum Thouars Orch. Afr. t. 85.* In both this plant and *P. lutëola*, Dr. Lindley has observed that the disk of the labellum is covered with a fine frost-like meanness, which is removed by the slightest touch, and which is "a curious modification of the hairs found in other plants. When undisturbed it consists of threads with egg-shaped joints, which are filled with air." The slightest touch destroys the cohesion between these joints, "so that when they

are placed on the field of the microscope, the latter appears as i. covered with the eggs of some insect ; it is only when they are removed from the labellum with great care, that their real articulated structure, and their analogy with such hairs as those of *Tradescantia* is made out." (*ib.*)

**PONERA graminifolia Lindl.**; syn. *Nemaebonia graminifolia Knowles & Westcott*. This was supposed to be a new genus; but Dr. Lindley, having carefully examined the plant in question, is convinced that it is of the same genus as *Ponera juncifolia*, described in the *Gen. et Spec. of Orchid. Plants*, p. 113. (*Bot. Reg.*, Feb. 1839.)

A TOUR IN SWEDEN IN 1838; comprising Observations on the Moral,  
Political, and Economical State of the Swedish Nation. By SAMUEL LAING,  
Esq. 8vo. 12s. cloth.

(Extract from AUTHOR'S PREFACE.)

"The calm which we have been enjoying for nearly a quarter of a century, after the storm of the French Revolution which shook the world, is perhaps the most important period that has occurred in the history of the human race. New powers, it may be said, have been granted to man during this period—new intellectual power, by the general diffusion of knowledge through the press—new physical power, by the general application of steam to machinery and movement. The changes which these mighty agencies are rapidly producing in the social condition of the lower and middle classes of every country—the circumstances in their ancient institutions, laws, and governments, which are retarding or accelerating the progress of these classes to a condition of higher moral and physical wellbeing—are objects peculiarly deserving the attention of the traveller; and it is a field in which, with the most ordinary intelligence and observation, he may be eminently useful. In Norway and Sweden such inquiries are peculiarly interesting at the present period, because these two nations, although the furthest removed from the agitation of the French Revolution, have, by a singular chance, been affected by it more permanently, and one of them more beneficially, than any others in Europe. Norway received a new and liberal constitution, and has started with the freshness of youth—a new nation, as it were, called suddenly into life from among the slumbering feudal populations of the North. Sweden received a new dynasty, and slumbers amidst ancient institutions and social arrangements of darker ages."

Having attempted in a former work to give a sketch of the present social condition of the Norwegian people, I have considered it necessary, in order to complete the view of the present moral, political, and economical state of the inhabitants of the Scandinavian peninsula, to undertake the following sketch of the Swedish."

## MR. LAING'S THREE YEARS' RESIDENCE IN NORWAY.

"For minuteness of information, and amplitude of details regarding the habits, manners, customs, and general condition of the Norwegians, this work of Mr. Laing's surpasses, we think, any that has yet appeared on the same subject. We ourselves have certainly met with no work capable of affording so complete and intelligible a picture of the domestic economy, of the ordinary mode of living, and daily pursuits of this interesting people, than what is presented to us in the pages of this very entertaining volume."—SCOTSMAN.

"A delightful little volume. . . . Mr. Waterton is evidently one who loves the pursuit of natural history for its own sake; he is one who rejoices in the happiness of God's creatures, and marks with delight the development of their instincts."

QUARTERLY REVIEW.

**DR. TURTON'S MANUAL OF THE LAND AND FRESH-WATER SHELLS OF THE BRITISH ISLANDS.** A New Edition, thoroughly revised, and with considerable Additions. By JOHN EDWARD GRAY, Esq. of the British Museum.

**INTRODUCTION TO LAMARCK'S CONCHOLOGY.** By E. A. CROUCH, F.L.S. 4to. 22 Plates, 31s. 6d. plain; £3. 3s. coloured.

**SHELL-COLLECTOR'S PILOT; also, the best Methods of Preserving Insects, Birds, &c.** By J. MAWE. 4th Edition, 5s. bds.

## NATURAL PHILOSOPHY, &amp;c.—CONTINUED.

**TREATISE ON THE STEAM ENGINE;** Historical, Practical, and Descriptive. By JOHN FAREY, Engineer. 4to. illustrated by numerous Woodcuts, and 25 Copperplates, engraved by Wilson Lowry, from Drawings by Messrs. Farey. £5. 5s. bds.—Vol. II. is in the press.

**AN INTRODUCTION TO GEOLOGY;** intended to convey a Practical Knowledge of the Science, and comprising the most important recent Discoveries: with Explanations of the Facts and Phenomena which serve to confirm or invalidate various Geological Theories. By ROBERT BAKEWELL. 5th Edition, considerably enlarged from the 4th Edition, and with new Sections and Cuts, price One Guinea, cloth, lettered.

“A work conspicuous for attractiveness, for perspicuity, for a style generally vigorous and correct—often elegant and beautiful, and for an independence of spirit which carries the author straight forward to his object without any servile regards to previous systems. Mr. Bakewell’s work has long been our favourite elementary treatise on Geology.”—ATHENÆUM.

**REPORT ON THE GEOLOGY OF CORNWALL, DEVON, AND WEST SOMERSET,** by order of the Lords Commissioners of Her Majesty’s Treasury. By HENRY T. DE LA BECHE, F.R.S. &c. Director of the Ordnance Geological Survey. 1 vol. 8vo. with numerous Sections and Plans. Price 14s. cloth, lettered.

**NEW SYSTEM OF GEOLOGY;** in which the great Revolutions of the Earth and Animated Nature are reconciled to Modern Science and to Sacred History. By A. URE, M.D. F.R.S. 8vo. with 7 Plates and 51 Woodcuts, 21s.

“We regard this New System of Geology as one of the most valuable accessions lately made to the scientific literature of our country.”—BRANDE’S QUARTERLY JOURN.

**CONVERSATIONS ON MINERALOGY.** With 12 Plates, engraved by Mr. and Miss Lowry. 3d Edition, enlarged, 2 vols. 12mo. 14s. cloth.

“The plan of these Conversations is happily conceived, and it is executed with ability and taste. The author has studiously avoided all unnecessary parade of technical diction, has rendered the doctrines of crystallography more familiar than heretofore to the tyro in mineralogy, and has included some of the most recently discovered substances. We may, therefore, unhesitatingly characterize this work as one of the most desirable text books that have issued from the British press.”—MONTHLY REVIEW.

**CONVERSATIONS—ON LAND AND WATER.** By Mrs. MARCET. With a coloured Map, showing the Comparative Altitude of the principal Mountains of the World. In fcp. 8vo. price 5s. 6d. cloth, lettered.

“Mrs. Marcet’s ‘Conversations’ have long been regarded as the best popular introductions to the science of nature. . . . The natural way in which one part of the subject is made to lead to the other, giving the effect of a continuous discussion—the lucid and graphic distinctness of the description—and the simplicity and aptness of the illustration employed—together with the familiar and playful style, and the pertinent anecdotes introduced—combine to render the ‘Conversations on Land and Water’ a delightfully entertaining as well as instructing book for the young; nay more, the information so concisely and exquisitely conveyed may be edifying to many readers of mature age. If science were oftener taught in this homely and simple way, the pursuit of knowledge would be infinitely more engaging to old and young.”—SPECTATOR.

**SCHOOL BOTANY**; or, an Explanation of the Characters and Differences of the principal Natural Classes and Orders of Plants, belonging to the Flora of Europe, in the Botanical Classification of De Candolle. For the use of the Students preparing for their **MATRICULATION EXAMINATION** in the University of London. In one volume, fcp. 8vo. with upwards of One Hundred and Sixty Woodcuts, price 6s. cloth, lettered.

**INTRODUCTION TO BOTANY.** 2d Edition, with Corrections and considerable Additions, 1 large vol. 8vo. with numerous Plates and Woodcuts, 18s. cloth.

"We have no hesitation in pronouncing the 'Introduction to Botany,' by Dr. Lindley, to be the most valuable and perfect in any language we are acquainted with."

MEDICAL GAZETTE.

"The most valuable work of the kind in our language."

BRITISH AND FOREIGN MEDICAL REVIEW.

"A work of classical excellence; most accurate, instructive, and pleasing. It is essential for every botanist to have a copy of it beside him."

MEDICO-CHIRURGICAL REVIEW.

**A NATURAL SYSTEM OF BOTANY**; or, a Systematic View of the Organization, Natural Affinities, and Geographical Distribution of the whole Vegetable Kingdom: together with the Uses of the most important Species in Medicine, the Arts, &c. 2d Edition, with numerous Additions and Corrections, and a complete List of Genera, with their Synonyms, 1 vol. 8vo. 18s. cloth.

**SYNOPSIS OF THE BRITISH FLORA**, arranged according to the Natural Orders. 2d Edition, with numerous Additions, Corrections, and Improvements, 12mo. 10s. 6d. boards.

**A KEY TO STRUCTURAL, PHYSIOLOGICAL, AND SYSTEMATIC BOTANY.** For the Use of Classes. 8vo. 4s. 6d.

**FLORA MEDICA**: or, a Botanical Account of all the most remarkable Plants applied to Medical Practice in Great Britain and other Countries. 1 vol. 8vo. price 18s. cloth, lettered.

"We feel bound to recommend it in a strong manner to the medical public. Many examples, which we might enumerate, shew how important it is that the investigation of medical plants should be taken up by some one fully qualified for the execution of so difficult a task. No one was better adapted to fulfil the object which he has professed than Dr. Lindley; and we feel confident that his work will obtain the patronage which it justly merits."—LANCET.

"We direct the attention of the student to the general value of the work, as an instructive guide in the acquisition of botanical knowledge,—to the correct descriptions given of medicinal plants and articles obtained therefrom,—to the great labour, research, and industry of the author,—and to the anxiety in rendering the information full, satisfactory, and precise; and we conclude by saying that the student will find in Dr. Lindley's work all that can be desired in a treatise on medical botany."

Part I. of a CONTINUATION, comprising 50 Plates and Descriptions, to be completed in 4 Parts, price 14s. each.

"Nothing can be more interesting to a man of science than the plants represented in these volumes; nothing can be in better taste or more faithful than the figures; and it is difficult to conceive how any thing can be cheaper."—ATHENÆUM.

## BOTANY, &amp;c.—CONTINUED.

**ELEMENTS OF PRACTICAL AGRICULTURE:** comprehending the Cultivation of Plants; the Husbandry of Domestic Animals; and the Economy of the Farm. By DAVID LOW, Esq. F.R.S.E. Professor of Agriculture in the University of Edinburgh. 1 vol. 8vo. 2d Edition, with Alterations and Additions, and above 200 Woodcuts, 18s. cloth, lettered.

"No work on agriculture has appeared in our time which will bear a comparison with this excellent, and we would say classical work, of Professor Low. It will become the manual of practical agriculture for the British empire; and the judicious views and sound rules of our author will unquestionably prove beneficial to the agriculturalists of other countries."—JAMESON'S EDIN. PHILOSOPHICAL JOURN.

**ELEMENTS OF AGRICULTURAL CHEMISTRY.** By Sir HUMPHRY DAVY, Bart. LL.D. F.R.S. &c. 5th Edition, with Notes by his Brother, Dr. JOHN DAVY, 8vo. 15s.

**THE CULTIVATION OF THE GRAPE VINE ON OPEN WALLS.** By CLEMENT HOARE. 8vo. New Edition, with Additions, 7s. 6d. cloth.

"Mr. Hoare has thrown more light on the subject of vine culture than any British gardener who has written on the subject."—LOUDON'S GARDENER'S MAGAZINE.

"One of the best productions upon any horticultural subject which has been published for some years."—ATHENÆUM.

**FIRST STEPS TO BOTANY.** By J. L. DRUMMOND, M.D. 12mo. 100 Woodcuts, 3d Edition, 9s. boards.

"This answers more completely to the proper notion of an introduction to botany than any work we have yet seen. It is truly scientific, and at the same time of an entirely popular character, replete with entertaining information, and adapted to make the study at once attractive and improving in a high degree."—ECLECTIC REVIEW.

**CONVERSATIONS ON BOTANY.** With 22 Engravings, 12mo. 8th Edition, enlarged, 7s. 6d. plain; 12s. coloured.

Bound in fancy cloth, lettered, with ornamental gilding, price One Guinea; or with India Proof Plates, Two Guineas.

Also in fcp. 8vo. with four Engravings, from Paintings by Westall, 10s. 6d. cloth.

By the same Author,

**IRISH MELODIES:** with an Appendix, containing the Original Advertisements, and the Prefatory Letter on Music. 13th Edition, fcp. 8vo. with engraved Title and Vignette, 10s. cloth lettered.

**THE POETICAL WORKS OF ROBERT SOUTHEY,** Esq. Collected by HIMSELF. 10 vols. fcp. 8vo. with Frontispieces and Vignettes, price £2. 10s. cloth lettered.

\* \* This Edition, which the Author has arranged and revised with the same care as if it were intended for posthumous publication, includes many pieces which either have never before been collected, or have hitherto remained unpublished. Preliminary notices are affixed to the long poems,—the whole of the notes retained,—and such additional ones incorporated as the Author, since the first publication, has seen occasion to insert. The Frontispieces and Vignettes consist of views appropriate to the respective volumes.

## POETRY—CONTINUED.

**THE POETICAL WORKS** of LETITIA ELIZABETH LANDON (late Mrs. MACLEAN.) New Edition, 4 vols. fcp. 8vo. with Portrait by M'Clise, and four other Illustrations by Howard, &c. price 28s. cloth lettered.

**JAMES MONTGOMERY'S POETICAL WORKS.** A complete collected Edition, comprising "The Wanderer of Switzerland," "The West Indies," "World before the Flood," "Greenland," "Pelican Island," "Songs of Zion," "Poet's Portfolio," and all his smaller Poems. 3 vols. foolscap, 18s. cloth lettered.

"We have long wished to see a uniform and cheap edition of the works of the most distinguished Christian poet who now graces the annals of our English literature. That wish is now gratified to its full extent. The volumes before us, both as to size, neatness, and price, are every thing that could be wished."—EVANGELICAL MAGAZINE.

**FAMILY SHAKSPEARE;** in which nothing is added to the Original Text, but those Words and Expressions are omitted which cannot with propriety be read aloud in a Family. By T. BOWDLER, Esq. F.R.S. New Edition, in 1 large volume, 8vo. with 36 Illustrations after Smirke, Howard, &c. 30s. cloth; with gilt edges, 31s. 6d. Or in large type, without Illustrations, in 8 vols. 8vo. £4. 14s. 6d. boards.

**REMAINS OF HENRY KIRKE WHITE,** selected, with prefatory Remarks, by ROBERT SOUTHEY, Esq. 2 vols. 8vo. 24s.; and 1 vol. 24mo. with engraved Title and Vignette, 5s.

**SELECT WORKS OF THE BRITISH POETS, FROM BEN JONSON TO BEATTIE.** With Biographical and Critical Prefaces, by Dr. AIKIN. 1 vol. 8vo. 18s. cloth; or neatly done up, gilt edges, 20s.

"A compilation which places before us the best portions of our best poets in a very accessible form, and in the selection of which we have the benefit of the sound taste and critical abilities of a gentleman so long and so usefully known to the world of letters as Dr. Aikin. The plan of the present volume is both comprehensive and judicious."

MONTHLY REVIEW.

**SELECT WORKS OF THE BRITISH POETS, FROM CHAUCER TO WITHERS.** With Biographical Sketches, by ROBERT SOUTHEY, LL.D. 1 vol. 8vo. uniform with "Aikin's Poets," 30s. cloth; or with gilt edges, £1. 11s. 6d.

**THE MORAL OF FLOWERS.** With 24 beautifully coloured Plates, royal 8vo. 3d Edition, 30s. half-bound.

"Full of exquisite poetry."—BLACKWOOD'S MAGAZINE.

By the same Author,

**THE SPIRIT OF THE WOODS.** 1 vol. royal 8vo. with 26 beautifully-coloured Engravings, price 36s. half-bound.

"Cold must be the heart, and dull the eye, that feels not, sees not, at a first glance, and on the perusal of a single page, that we are indebted for this most elegant volume to the soft pencil and finer pen of a lady."—ANALYST.

"This is indeed a charming volume, and one which we think no one, unless utterly devoid of all taste for that which is tasteful, can peruse without admiring the feeling and beautiful manner in which the authoress introduces the ideas and associations that in so many instances are inseparably connected with our indigenous forest trees."

MAGAZINE OF NATURAL HISTORY.

**JOANNA BAILLIE'S POEMS, &c.** New DRAMAS, 3 vols. 8vo. 36s.—A SERIES OF PLAYS, in which it is attempted to delineate the stronger Passions of the Mind, 3 vols. 8vo. £1. 11s. 6d.—MISCELLANEOUS PLAYS, 8vo. 9s.—METRICAL LEGENDS, 8vo. 14s.

## RELIGION, THEOLOGY, &amp;c.

## WORKS BY THE REV. S. T. BLOOMFIELD, D.D. F.S.A.

THE GREEK TESTAMENT; with copious English Notes, Critical, Philological, and Explanatory; 3d Edition, greatly enlarged and very considerably improved, in 2 closely printed vols. 8vo.; with Map of Palestine, price £2. handsomely bound in cloth lettered.

(Dedicated to his Grace the Archbishop of Canterbury.)

"Much as had been done in the two preceding impressions, the THIRD edition is yet farther enlarged (to the extent of not less than 200 pages), and considerably improved. This third edition of the Greek Testament may justly be regarded as the most valuable for biblical students that has yet been issued from the press in this country."

HORNE'S INTRODUCTION TO THE STUDY OF THE SCRIPTURES.

COLLEGE AND SCHOOL GREEK TESTAMENT, WITH ENGLISH Notes. Second Edition, with Additions, and a New Map of Palestine, adapted to the Gospel History. One thick volume, 12mo. 10s. 6d. cl. let.

"This edition of the Greek Testament supplies a desideratum in scholastic literature. The notes (which are strictly grammatical, scholastic, and elementary) furnish to the juvenile student every requisite aid for the correct interpretation of the New Testament."—CHRISTIAN REMEMBRANCER.

"It is impossible to say how far the public are indebted to Dr. Bloomfield for these labours of his industrious pen; they will carry down his name with the highest honour to posterity. Our prayer is, that his invaluable life may long be spared, and that he may be permitted to reap the full reward of his self-sacrificing devotion to the imperishable interests of Biblical science."—EVANGELICAL MAGAZINE.

THE HISTORY OF THE PELOPONNESIAN WAR. BY THUCYDIDES.

Newly Translated into English, and accompanied with very copious Notes, Philological and Explanatory, Historical and Geographical; with Maps and Plates. 3 vols. 8vo. 45s.

"In the Notes by this translator, numerous interesting points of classical antiquities are ably discussed, and many thousands of invaluable illustrations of the obscure passages of the author are adduced from the best Greek writers of every age. As to the version, considering the all but insuperable difficulties with which the translator has had to contend, in a writer said by some great scholars to be untranslatable, we can with truth say, that he has executed his task with fidelity, taste, and judgment. Upon the whole, we can pronounce the work to be quite indispensable to all who would hope to understand the text of the greatest of historians, but most obscure of writers."

GENTLEMAN'S MAGAZINE.

THUCYDIDES. New Recension of the Text, with copious English Notes, Critical, Philological, and Explanatory; Examination Questions, &c. for the Use of Colleges and the Public Schools. 3 vols. post 8vo. £1. 7s. bds.

"We feel confident that no reader of Thucydides will fail to purchase an edition where, be their scholarship what it may, they cannot rise from its perusal without having learnt much that they did not know before, and which they cannot obtain elsewhere.... We will not do the tutors of colleges, and masters of public schools, the injustice to believe that they are so regardless of their own reputation and their pupil's improvement, as not to adopt the only edition of Thucydides, which this or any other country has produced, really suited for the instruction of young persons."—GENTLEMAN'S MAG.

"Thucydidis Historia Græcæ, a doctissimo Britanno ternis voluminibus elegantissimè edita."—PROF. POPPO, of Frankfort, in *Pref. to his noble Variorum Edit. of Thucydidis*, 10 vols. 8vo.

ROBINSONS GREEK AND ENGLISH LEXICON OF THE NEW TESTAMENT. Edited, with careful revision, corrections, occasional additions, and a Preface, by Dr. BLOOMFIELD. 1 vol. 8vo. 28s. cloth.

"Dr. Robinson's Lexicon, as edited by Dr. Bloomfield, hardly requires our warm and sincere praise. It must prove of great value to every student who is wise enough to procure it."—BRITISH CRITIC AND QUARTERLY THEOLOGICAL REVIEW.

"We consider this the best Lexicon of the Greek Testament that is extant. Dr. Bloomfield has proved himself a most indefatigable scholar, and his present edition deserves unbounded success."—CHURCH OF ENGLAND QUARTERLY REVIEW.

## RELIGION, THEOLOGY, &amp;c.—CONTINUED.

By the same Authoress,

**WOMAN IN HER SOCIAL AND DOMESTIC CHARACTER.** 5th Edit. fcp. 8vo. 6s. cloth.

"We could wish to see these useful volumes in the hands of every young lady on her leaving school. They would aid greatly in the formation of character, in correcting current mistakes of life, in invigorating the intellect, in refining and elevating the taste, and above all in imparting a high tone of moral and religious sentiment to the mind."—EVANGELICAL MAGAZINE.

**WORKS OF GENERAL UTILITY.**

**A POPULAR LAW DICTIONARY**; with New Tables of Descent and Consanguinity. By T. E. TOMLINS. 1 thick volume, of nearly 600 closely printed pages, 8vo. 18s. cloth, lettered.

"We have examined several subjects on which we happen to have some of the knowledge of experience, and the sharpness of interest; and in these we find the work full, clear, and to the point."—SPECTATOR.

**PLAIN DIRECTIONS FOR MAKING WILLS** in conformity with the NEW ACT, which came into operation on the 1st January. By J. C. HUDSON, of the Legacy-Duty Office, London. 8th Edition, fcp. 8vo. price Half-a-Crown, neatly done up in cloth, gilt edges.

By the same Author,

**THE EXECUTOR'S GUIDE.** 2d Edit. fcp. 8vo. 5s. cloth, gilt edges.

"Mr. Hudson is evidently a sensible practical man, who does not write books by the square foot, but who seeks only, and we think successfully, to convey in plain and concise language his instructions briefly and cheaply to poor will-making or administering mortality."—ATHENÆUM.

\* \* The above two works may be had bound together in one volume,  
price 7s. cloth, lettered.

**HINTS ON ETIQUETTE, AND THE USAGES OF SOCIETY**; with a Glance at Bad Habits. By Αγαγὼς. 18th Edition. Fcp. 8vo. 2s. 6d. gilt edges.

WORKS OF GENERAL UTILITY—CONTINUED.

**INSTRUCTIONS TO YOUNG SPORTSMEN.** By Lieut.-Col. P. HAWKER.  
8th Edition, greatly enlarged and thoroughly revised, with new Cuts of  
of Heads of Wild and Tame Swans, all his last new Coast Gear, with many  
other original subjects, and containing altogether 60 Plates and Woodcuts,  
1 vol. 8vo. 21s. cloth lettered.

“From the extent and variety of its information, this work can be viewed in no other  
light than the critical observations of a veteran and scientific Sportsman. Experience  
has been his tutor, and practice his expounder, of all the arcana of his favourite hobby,  
which he rides with confidence, derived from actual warfare in the field of his labours.  
Though addressed to the young sportsman, it must not be considered solely as the  
Mentor of the tyro; grey beards may learn wisdom from his rudiments; and we do not  
scruple in adding that the most experienced will pause at their ‘old familiar doings.’”  
SPORTING MAGAZINE.

**THE GUN;** or, a Treatise on the Nature, Principle, and Manufacture of the  
various descriptions of Small Fire-Arms. By WILLIAM GREENER. 1 vol.  
8vo. Plates, 15s.

THOMAS BULL, M.D. Physician-Accoucheur to the Finsbury Midwifery  
Institution, &c. 2d Edit. greatly enlarged. Fcp. 8vo. 7s. cloth lettered.

“There is no mother that will not be heartily thankful that this book ever fell into  
her hands; and no husband who should not present it to his wife. We cannot urge its  
value too strongly on all whom it concerns.”—ECCLECTIC REVIEW.

**A COMPLETE LATIN-ENGLISH AND ENGLISH-LATIN DICTIONARY;**  
compiled from the best Sources, chiefly German. By the Rev. J. E. RIDDLE,  
M.A. Curate of Harrow; Translator and Editor of Scheller’s large Latin  
Lexicon, which has recently appeared from the Oxford University Press.  
8vo. 31s. 6d. cloth.

“An admirable Dictionary, and promises more help to the Latin student than any  
thing hitherto afforded him in this country.”—EVANGELICAL MAGAZINE.

(Separately) English-Latin, 21s.; Latin-English, 10s. 6d. cloth.

**YOUNG SCHOLAR’S LATIN-ENGLISH AND ENGLISH-LATIN  
DICTIONARY;** being an Abridgment of the above. Sq. 12mo. price 12s.;

the Duties and Responsibilities incident to the due Performance of their  
Trusts; with Forms properly filled up for every Bequest. By J. H. BRADY,  
late of the Legacy-Duty Office, Somerset House. 8vo. 6th Edition, improved  
to the latest date, 8s.

\* \* This work contains information of a more technical nature than Mr.  
Hudson’s work, and is therefore adapted to the use of Attorneys as well as the  
Public.

**DOMESTIC DUTIES;** or, Instructions to Young Married Ladies on the  
Management of their Households, &c. &c. By Mrs. WILLIAM PARKES.  
12mo. 4th Edition, 10s. 6d. cloth, lettered.

“The volume before us is one of those practical works which are of real value and  
utility. It is a perfect VADE-MECUM for the young married lady, who may resort to it  
on all questions of household economy and etiquette. There is nothing omitted with  
which it behoves a young lady to be acquainted.”—NEW MONTHLY MAG.
